## Project-Based Learning

...activities designed to answer a question or solve a problem, and that generally reflect the types of learning and work that people do in the everyday world outside of the classroom.

~ Buck Institute for Education ([www.bie.org](http://www.bie.org))

## *Ramp Challenge*

Your ramp must...

- ✓ reach a minimum height of 10 inches at its highest point,
- ✓ carry a wooden ball the entire length of the ramp without being touched after the ball is released.
- ✓ cause the wooden ball to change direction at least once.

\* Ruler, scissors, and ball may not be part of the ramp.

## *Reflections*

Ways to increase the level of challenge...

General tips for classroom replication...
